

RYGEL YANCE

Seeking Entry-Level Data Science/Machine Learning Positions

☎ (443) 805-7268 | ✉ Rygelyance1@gmail.com | [in LinkedIn](#) | [GitHub](#) | [Personal Site](#)

PROFILE:

Organized and driven professional with proven skills in research, data analysis, and interpreting complex subjects, including nuanced data trends, hypothesis testing outcomes, and sophisticated statistical and machine learning models. Strong academic foundation with dual bachelor's degrees in Computer Science and Mathematics, completed in three years.

EXPERIENCE:

Southern Economic Association Conference | November 23, 2024

Presenter of "Do Light Rails Provide a Track to Cleaner Air?" | Washington, DC

- Presented independent research at the 2024 Southern Economic Association Annual Conference, one of the leading forums for economic scholarship and applied research.
- Analyzed 10,000+ points of air pollution data across eight different cities using the Difference-in-differences statistical model in R to ascertain the impact of light rail openings on air pollution. [GitHub Page](#)

Immersive Research Internship Experience (IRIE) | June 2024 – August 2024

Undergraduate Research Assistant | College Park, MD

- Analyzed 3000+ air pollution measurements obtained from NASA Earthdata across 37 light rail stations using a discontinuity-based ordinary least-squares regression to determine the impact of the METRO Blue/Green lines on different demographic groups.
 - Showcased results at the 2024 Summer Undergraduate Research Conference at the University of Maryland. [GitHub Page](#)
-

EDUCATION:

University of Maryland, College Park | August 2022 – May 2025

- Bachelor of Science in Computer Science, specializing in Machine Learning | GPA: 3.437
- Bachelor of Science in Mathematics, specializing in Statistics | GPA: 3.270
 - Honors: Dean's List, three semesters, awarded for a semester GPA of 3.5 or above with at least 12 registered credits.

First-Year Innovation and Research Experience (FIRE)

Peer Research Mentor

- Learned practical skills using R for data wrangling, cleaning, and analysis.
- Learned to model using basic and multiple regression by replicating results from existing research papers.

Leatherbacks Combat Robotics

Club Member

- Designed four functional one-pound combat robots utilizing Fusion360. Custom manufactured a variety of parts utilizing 3D-Printing.
-

PROJECTS:

Machine Learning Colorization Engine | May 2025

- **What:** Built and trained a UNet Machine Learning Model utilizing CUDA acceleration on 5000+ images to produce colorizations of black and white images.
- **Used:** Python, PyTorch, NumPy, Matplotlib, Scikit-image, attention blocks, residual blocks, UNet architecture
- [GitHub Link](#)

My Portfolio | August 2024

- **What:** Designed and built a custom website to showcase projects and skills and to strengthen proficiency in website creation and design.
 - **Used:** HTML, Cascading Style Sheets (CSS), GitHub Pages
 - [GitHub Link](#)
-

TECHNICAL SKILLS:

Languages:

- Expert: Python, R, Java, C
- Advanced: OCaml, Rust, MATLAB, SAS
- Intermediate: HTML, CSS, JavaScript, MIPS Assembly

Data Analysis & Visualization: Data Wrangling, ggplot2, Matplotlib, Seaborn

Tools and Databases: OpenCV, PyTorch, Pandas, NumPy, Scikit-learn, SciPy, MATLAB, VSCode, Eclipse, EMACS, Git, SQLite, LaTeX, NASA Earthdata
